Summary

Final-year CSE student with hands-on experience in cybersecurity, software development, C#/.NET, Python, web technologies, SQA, and applied research. Builds security tools and software applications with a strong focus on practical problem-solving, testing, and security assessment. Seeking an internship in cybersecurity, software development, or SQA to contribute technical skills and deliver practical solutions.

Skills

Programming Languages

C++, C#, Java, Python

Database

MySQL

Platforms

Git, GitHub, Linux, Docker, VirtualBox

Web

HTML, CSS, JavaScript, PHP

Cybersecurity

Web Security, Vulnerability Assessment, Security Automation, Network Reconnaissance

SQA and Testing

SDLC & STLC, Manual Testing, Functional Testing, Regression Testing, Test Case Design, Bug Reporting, Defect reporting and tracking, GUI testing, Jira, Selenium

Frameworks

.NET Framework, Java Swing

Security Tools

Burp Suite, Nmap, Wireshark, Nikto, Hashcat, John the Ripper

Projects

VulnScope – Automated Web Security Assessment Framework [↗](#)

Python | Security Automation | Web Security

- Built a modular Python framework for automated web security assessment.
- Implemented dedicated security analysis modules for HTTP headers, cookies, TLS configuration, and web application behavior.
- Added structured target scanning and security findings to support repeatable assessments.
- Designed the project with a modular architecture to allow additional security checks and analyzers to be integrated.
- Developed and tested the framework in controlled environments using local vulnerable applications and authorized targets.

Project link : <https://github.com/Naimf/VulnScope> [↗](#)

ReconX – Network Reconnaissance & Security Automation Tool [↗](#)

Bash | Linux | Networking

- Built a Bash-based network reconnaissance framework for automated security assessment.

- Integrated Nmap scanning, service/version enumeration, OS fingerprinting, and fallback TCP probing.
- Implemented FTP, SSH, HTTP, SMTP, and IMAP banner grabbing for service identification.
- Added DNS/WHOIS reconnaissance, subdomain enumeration, vulnerability checks, and SMB security checks.
- Generated timestamped reconnaissance reports for organized assessment results.

Project link : <https://github.com/Naimf/reconx> 

Dream Property Ltd – Property Marketplace Desktop Application

C# | .NET

- Developed a desktop property marketplace application for listing, advertising, buying, and selling properties.
- Implemented property management and seller-contact functionality.
- Designed the application around a marketplace workflow similar to real-world property platforms.

Project link : <https://github.com/Naimf/Dream-Property-Ltd-using-C-sharp> 

Finance Tracker – Personal Expense Management Web Application

PHP | JavaScript | MySQL

- Developed a web application for recording and organizing daily expenses.
- Implemented user authentication and account management.
- Added financial record management using PHP and MySQL.
- Built the application with JavaScript-based frontend functionality.

Education

05/2022 – Present	B.Sc. in Computer Science & Engineering American International University-Bangladesh (AIUB)  CGPA: 3.45 / 4.00
2020	Higher Secondary Certificate Dinajpur Government College Group : Science GPA : 5.00
2018	Secondary School Certificate Dinajpur Zilla School Group : Science GPA : 4.72

Publications

2026	Empirical Benchmarking of Password Hashing Algorithms Under Controlled Offline Cracking Conditions International Conference on Data Mining & Information Security (ICDMIS), Kolkata, India Status : Accepted
------	---

Certifications

Certificate in Cyber Security and Ethical Hacking (2020)
